Dear Customer,

The instructions for usage of the products you have purchased:  
**6 RC-4 and 1 Tela-Chem 1 litre.**

**RC-4:**

Put ½ a bag of **RC-4** down one of your toilets each month last thing at night. Please rotate in which toilet you are applying the product to ensure that your pipes from each are cleaned on a regular basis. Please allow this to sit in the pipes overnight with little usage of the system to ensure proper cleaning.

For a family of more than 4 you will need to use one full bag of **RC-4** on the same monthly basis.

**Tela-Chem:**

Pour 1/2 cup every three months into a different drain in your home. This should be done last thing at night. Please allow this to sit in the pipes overnight with little usage of the system. This will help to digest whatever organic materials that may be clogging your pipes (ie. Hair, food, lint, etc). **Tela-Chem** can also be poured into the washing machine drain pipe behind your machine to clean out lint and buildup. If required use more frequently. Can not be over used.

By using our products in this way, you ensure the maximum life of your drainfield and septic system. Pumping is also required every 5-6 years rather than every 2-3. When the system is pumped out, please add 1 full bag of **RC-4** immediately to ensure proper bacterial levels are maintained in the tank for waste digestion.

If you have any further questions please do not hesitate to phone. Thank you for choosing **TELAMODE'S** fine products.

*“Let our family help yours be part of a green tomorrow”*
